Focal Theme

“Global Economy, Sustainable Tourism and Climate Change”

Global economy is the economy of the humans of the world, considered as the international exchange of goods and services that is expressed in monetary units of account. Tourism has become one of the most remarkable industries in the contemporary world and it is a key driver for the economies of many countries worldwide, this has led to an essential Rise in the tourism related studies and researches in the past years. With increasing global tourism and the growth of tourism as a domain of revenue generating business, the concept of Mass tourism became a trend. Mass tourism aims at quick economic benefit generation, ignoring the notions of environment, social impacts & sustainable development, it focuses mainly on exploitation of resources for economic benefits as soon as possible. This has led to a surprising fall in the quality of environment and depletion of natural biomes. To counteract mass tourism, the idea of Alternative tourism, which emphasizes on the need to preserve social, natural and historical assets of tourist destinations was brought up.

As today most humans are becoming increasingly intolerant to pollution and environmentally degraded conditions, the need of the hour is to sustain the Natural Resources as well as to maintain is not improve the mortifying condition of the environment. Sustainability could be defined as an ability or capacity of something to be maintained or to sustain itself. Sustainability is the collection of policies and strategies employed by institutions and companies to minimize their environmental impact on future generations. Quite diverse approaches have emerged to attain the replenishment of resources and to draw focus to the otherwise blur ideas like social responsibility, health, tourism alternatives, new tourist attraction development etc. The theme of the conference here is to reflect and highlight the cardinal need to protect the environment while also maintaining the widespread tourist activities. The paramount goal is to include various aspects of tourism like medical tourism, social tourism, rural tourism, thermal tourism, bird watching tourism, dark tourism, ecotourism and nature tourism. In addition, it includes wine tourists, ethnic restaurants, national parks, festivals. While inferring a plan or design to establish greener solutions and pilot plans for sustainability and environmental issues.

In this sense, the interrelated structure of tourism and other disciplines, It is obvious that, there will be other new issues related to tourism in the near future. Cultural, environmental, technological and behavioral changes will affect the needs and expectations of tourists who are the consumer of tourism phenomenon. In this changing environment, keeping up with recent trends can provide advantages. The principle target of the conference is to ensure better scientific interaction and ensure active participation along with academic cooperation globally. Also another goal is to give the young scholars and geographers to come up with and present contemporary ideologies and remedies to the chronically ill environment. The nucleus of the conference is to act with utmost urgency towards the pressing need of sustaining the earth's environment, the planet we call home. Climate Change is the economy of the humans of the world, considered as the international exchange of goods and services that is expressed in monetary units of account.

ABOUT THE UNIVERSITY OF RAJASTHAN

The University of Rajasthan, Jaipur had celebrated its 71st foundation day on the 8th January 2017. It consists of seven constituent colleges, 37 Post-graduate departments and 20 specialised research centres, the latest being Centre for Converging Technologies (CCT), and Centre for Museology and Conservation. It has approximately 663 affiliated colleges (both government and private). The main faculties are Arts, Fine Arts, Social Sciences, Science, Commerce, Management Studies, Law and Education. UGC has recognized the University of Rajasthan amongst the top 15 Indian Universities with Potential for Excellence (UPE) in 2012. The scheme of the UPE was introduced by the UGC during the IX Plan period ‘to provide substantial support to selected Universities with Potential for Excellence.’ The intention was to make these Indian Universities comparable to the world class Universities by enabling them to adapt to modern methods of teaching and learning, developing learner-friendly lecture materials, changing their evaluation methods and striving for excellence, to sustain them in this competitive world. In addition, Department of Science and Technology (DST) recognized the University of Rajasthan for the grants under its Promotion of University Research and Scientific Excellence (PURSE) Programme. In appreciation of the R&D contributions of the performing Universities, PURSE initiative was taken by Department of Science & Technology, Government of India to initiate value added proactive measures through introduction of R&D incentive grant.” PURSE scheme provides substantive research grant to Universities based on scientific publications in Science Citation Indexed (SCI) Journals through SCOPUS database.
